APPROVED
KEITH CORLIN

PURPOSE

Define the packaging requirements for packaging test shipments.

STANDARDS

Packaging Test Shipments

- DMMI or the supplier can request a packaging test shipment to verify the part/packaging quality during transportation.
- The supplier is responsible for arranging the timing of the trial with DMMI PCE.
- The supplier completes the method section of the Packaging Test Shipment Form (see FRM-010) and must attach it to the test box/pallet.
- Test shipment should be sent to DMMI PCE with out bar code tags with only FRM-010 as identification.
- DMMI PCE reviews the test shipment when received and completes the result section of the Packaging Test Shipment Form (FRM-010).
- DMMI PCE will return the parts to the supplier for their quality review once the evaluation is complete.
